

GEOGRAPHICAL LOCATION OF CONSUMERS / COUNTER

The reporter uses the handheld device to check and perform all the assigned tasks. **mUtilities** enhances even further the user by providing customer GPS tracking location mechanism that helps the reporter to find his way to customer's address.

GENERAL INFORMATION OF CONSUMER / COUNTER

When a user choose a “book” then the application automatically presents the following data:

- Book description – includes the area and the book
- Consumers – indicates the number of consumers
- Counted – indicates the number of consumers that the recorders did not visit yet
- Finished - a checkbox which is automatically marked by the system when all consumers of the book have been recorded by the recorder
